## Multi-Function Table Socket With Built-in Wireless Charger and Bluetooth Speaker

The BJQ-P1 multi-function table socket is a product that integrates many devices into the same product, such as Wireless Charger, Bluetooth Speaker, USB Charger, Power Socket with a luxurious and classy electric opening .

The BJQ-P1 multi-function under-table socket is a under-table power socket product that integrates many convenient devices into the same product, such as Wireless Charger, Bluetooth Speaker, USB Charger, Power Socket with smart electric opening and closing mechanism and surrounded by a modern, sophisticated design, luxurious materials make the product valuable.

# Multi-Function Table Socket With Built-in Wireless Charger and Bluetooth Speaker

On the **BJQ-P1 under-desk socket**, users can immediately feel the relatively solid weight of the product because the material of the shell is made of solid aluminum, sturdy, luxurious but still ensures the weight at a moderate level. BJQ-P1 has 4 colors for users to choose from including Silver, black, Gray, and gold, which respond well to many different table surface colors.

The **BJQ-P1 under-desk power outlet** stands out with its tower-shaped design (cylindrical shape) that allows users to easily operate, especially when plugging the cord into the power outlet to avoid pinching the plug when using. The cylindrical design of the BJQ-P1 allows the manufacturer to integrate many functions on the same product but still ensures the criteria of being small, compact, and more modern when the power outlet can also be hidden under the table when not in use.

Charging the phone through 2 available connection ports on the product including USB and wireless charging is the second feature of the BJQ-P1 under-desk power outlet. This is really a necessary feature in the era of using many smart devices like today when the manufacturer equips 4 USB-A charging ports with a capacity of 6A and 1 integrated wireless charger on the product cover to optimize the product's features to the maximum.

# Multi-Function Table Socket With Built-in Wireless Charger and Bluetooth Speaker

The last and most outstanding feature of the BJQ-P1 under-desk power outlet is the Bluetooth speaker. Yes, you heard it right, a power outlet product equipped with a Bluetooth speaker feature is very interesting when users can use it as a regular power outlet but at the same time it is also an entertainment device after stressful working hours.

The third feature of the BJQ-P1 socket is the ability to automatically open and close the device by electricity through the touch button. When using, the user just needs to press the button, the product will automatically pop up and do the same when wanting to close the product. It is more convenient when the BJQ-P1 allows the user to lock the device by holding down the touch button for 3 seconds, especially useful when there are children in the house. In addition, the BJQ-P1 will automatically lock when not in use for 15 minutes. Another advantage of the electric opening and closing feature compared to the normal mechanical type is the ability to flexibly stop at a desired position by pressing the button.

## Technical Specifications of Multi-Function Table Socket BJQ-P1

Product code	<b>BJQ-P1</b>
Input voltage	220V
Size when raised above table top	145 mm
Body size when closed	305x160x170mm,
Hole size	95Φ
Color	Gold, Silver, Black, Gray
Additional features	<b>10W wireless fast charger</b> <b>4 USB ports 5V2.1A</b> <b>2 Universal multi-purpose sockets 220V 10A</b> <b>Automatic opening and closing</b> <b>Smart anti-pinch ability</b> <b>Bluetooth 4.0</b>
Installation method	Installed under the table, can be folded down when not in use
Installation range	Bar counter, Desk, executive desk, meeting table, kitchen counter, conference table,...
