## PRODUCT DESCRIPTION

## Short Description

**Name: Waterproof Wifi Smart Motorized Socket**

- 1. Figures:**
- \* IP65 Waterproof
  - \* Wireless charger
  - \* 18W fast charge
  - \* USB 3A output
  - \* Bluetooth Speaker
  - \* Device sharing.
  - \* Wifi connection
  - \* Wireless charger
  - \* One App control
  - \* Night lighting
  - \* Voice control
  - \* Control your device anywhere

**2. Have CE certificates and Intertek IP65 testing report.**

**3. EMC rated directive: 2014/30/EU**

Confirmed to standards: EN55032: 2015+A1:2020+A11:2020  
 EN IEC 61000-3-2: 2019

# ***STP SERIES VERTICAL POP UP SOCKET***

STP-1 series vertical Pop-up outlets are an ideal, convenient and versatile solution for bringing power and data connectivity to Kitchen countertop, office spaces or your home when needed, without compromising the appearance, The IP54 rated Cover Top when in closed position, provides protective coverage against water splashes and dust particles to ensure longer product lifespan .

Equipped with an overload protection switch for safe operation and accepts wide range of power and data modules for custom flexibility .  
When the outlet is not needed, smooth flat top sits nearly flush with the surface .

Optional wireless-charging top allows you to power Qi-enabled devices by simply placing it directly on the pad .

# VERTICAL POP UP SOCKET

## Features

- **Overload protection ( Not include GFCI model )**
- **Can be supplied with combinations of power, data modules .**
- **Available in a variety of configurations .**

**Suitable for Installation within :**

**Meeting Rooms**

**Office**

**Kitchen**

**Tea Room**

**Laundry**

**Bedroom**

**With various top covers for option :**

**Stainless Steel**

**Aluminum**

**Brass**

**Black Resin**

**Wireless-Charging with various top covers for option :**

## ***SMT SERIES MOTORIZED POP UP UNIT***

Today's modern workspaces demand advanced functionality and aesthetic appearance. Our SMT series motorized pop-up unit enable you to achieve these contemporary features, embodying a unique blend of practical functions and modern-inspired design .

Not only will your workspace become more productive and better connected with this incredible addition, but it will also feel ingenious and stylish thanks to the elegant weathered finish and sturdy character.

*Suitable for Installation within :*

**Kitchen**

**Meeting Rooms**

**Office**

**Study Room**

**Living Room**

**Bedroom**

*The flashing LED light enhances the socket top center when the unit is in motion creating a seamless blend to its simplistic & impressive design .*

*When not in use, the sleek top cover sits flush with the tabletop surface for a discreet and tidy appearance .*

## **MOTORIZED POP UP UNIT**

### **Features**

#### **Wireless Charging :**

*Wireless-charging top allows you to power Qi-enabled by simply placing it directly on the pad .*

#### **Anti-Trap Safety Mechanism :**

*Senses any obstacle in the path whilst it is lowering, if this occurs the unit reverses direction and raises again .*

#### **Anti-Force Mechanism :**

*Senses any heavy object in the path whilst it is rising, if this occurs the unit stops lifting and retracts to flush position .*

#### **IP 54 weatherproof protection :**

*When in closed position, IP54 seal provides almost complete protection from particles and a good level of protection against water .*

Step 3: Complete the installation.

# Wireless Charging with Chargeable LED Color

## Wireless Charging with Chargeable LED Color

The cutting-edge wireless inductive technology simplifies charging. Simply place your qi-compatible device on the charger and it will automatically begin charging. It's small and light, easy to put in your pocket, the wireless charging pad makes it easy to carry during travel or business, Perfect office and home use.

## Wireless Charging With chargeable LED color Details:

- . DC power input: 12V=2A
- . Type C: support PD and QC Protocols, 220W
- . Output parameters: The total output power of wireless module is 15W
- . Executive standard: Qi standard

## Wireless Charging With chargeable LED color Feature And Application:

Wireless Charging With chargeable LED color suitable for any scenario, as long as you need power, it can be carried with you, and it is possible to have power available at any time and anywhere. It is more convenient than wired charging, so that your desktop is clean and organized.

## Defferent Cover Color for option

# Embedded Wireless Charging

## Embedded Wireless Charging

Embedded Wireless Charging is made of PC material, which is strong, wear-resistant and waterproof. It is mounted from the bottom up. There is no trace on the desktop. Just mark the charging position. Embedded Wireless Charging can quickly charge the phone, and stay away from the complexity of the cable, keeping the desk tidy. Arbitrarily installed at the bottom of the desktop, can be embedded in various desktops such as desks, dining tables, dressing tables, etc.

### Embedded Wireless Charging Details:

Input: DC 12V=2A

DC plug output specification: 5.5x2.1mm

Type-C: Support PD and QC Protocols,  $\geq 20W$

Output: The total output power of wireless module is 15w

Embedded Wireless Charging has a diameter of  $\phi 75 \times 30.7$ mm inch and can be inserted into most standard-size desk holes.

Hole size for the embedded base:  $\phi 60$ mm

## Embedded Wireless Charging Feature And Application:

Embedded Wireless Charging suitable for modern office environment as well as many other applications including restaurant, bar, cafes, airports, railway stations, office desk, dining table, coffee table, bedside table, etc.

# Embedded Lifting USB Charger

**Pop them up when you need to charge, tuck them away if when you don't. Mounted under the surface of a table, countertop or any piece of furniture, it can turn almost any piece of furniture into a fast wireless charging station.**

**It has wireless charging and USB port. Can provide power for multiple devices.**

**Embedded lifting USB Charger can help you tame clutter, let you use a single charger for almost any phone and even spark joy, assuming you'd rather see a sleek charging pad on your counter, desk or nightstand than a rat's nest of cables. Multi-device chargers can further simplify your setup, giving you a single spot for your phone, smartwatch, wireless headphones or even a second phone. Wireless charging may never be as fast or efficient as wired charging, but it can be a lot more convenient. There are two ways to charge the Embedded lifting USB Charger, which not only charges wirelessly, but also connects to USB for charging.**

## **Embedded lifting USB Charger Details:**

- Interface type: USB-Ax1, USB-Cx1, wireless x1
- Input parameters: DC 24V-3A
- Wireless output: 5V1A, 7.5V-1A, 9V.1.12A, 9V.1.66A (15W Max)(support Qi protocol)
- USB-A output: 5A-3A, 9V=2A, 12V-1.67A(18w Max) (support QC3.0)
- USB-c output: 5A-3A, 9V--2.22A, 12V--1.67A(20WMax) (support PD, QC3.0)
- USB-A+USB-C output: 18W+20W(38W Max)
- USB-A+ wireless output: 18W+15W(33W Max)
- USB-C+ wireless output: 20W+15W[35W Max]
- USB-A+USB-C+ wireless output: 18W+20W+15W(53W Max)

## *Home Office Desk Power Track System Electric Socket Outlet*

### *Introduction:*

*What is a track socket? Are track sockets safe? How to install the track socket? Some of the socket is not suitable to replace more trouble! The rise of the track socket has completed the incomparable function of the old socket: the socket is sensitive dragging, dealing with the problem of too short electrical power cord; The socket is not good or the socket is not good, you can add the adapter at will, without the device; Track and wall or home integration, more show high-end temperament.*

## Power Track System Electric Socket Outlet

**flexible configuration.** The number of traditional socket installation is determined and cannot be changed. Later, it is found that the number of socket is not enough, and it can only be solved by the plug board, which is ugly and troublesome. But! With the track socket, you just need to install the socket module on the track. Use the plug board? It doesn't exist. In addition, the track socket can be customized according to the needs of the length, is also a very intimate design.

**The sockets on the rails are removable.** Often we encounter is the socket design location is not reasonable, resulting in electrical appliances with insufficient wire length is very embarrassing. Had track socket, can adjust the position of socket at will, need not worry about power supply line to grow not enough again.

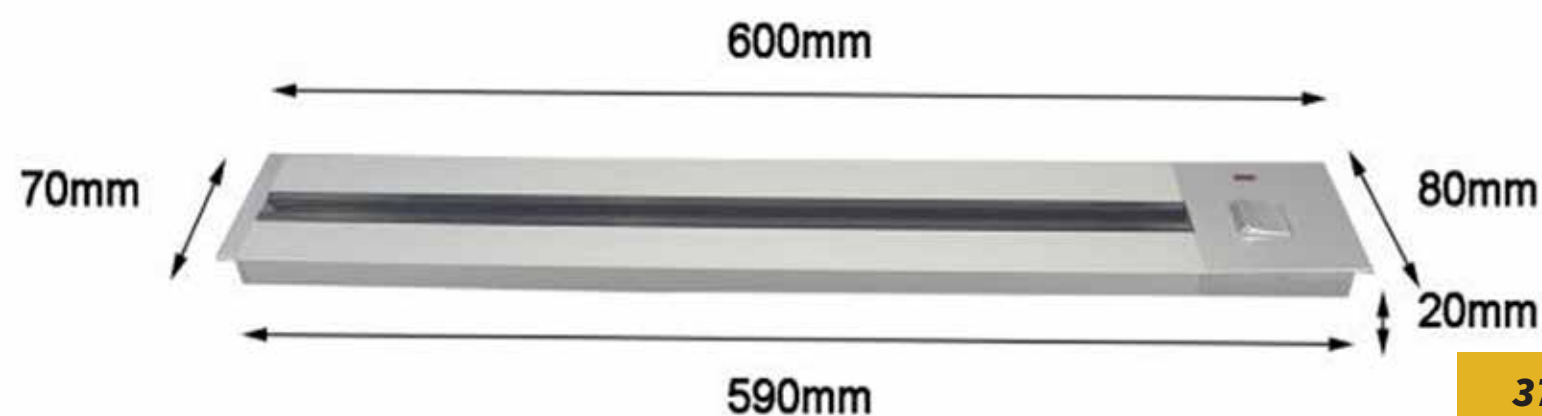

**practical and convenient, more safe.** Track socket, can be adapted to a variety of different types of socket, only need to plug the socket into the track, clockwise rotation of 90°, LED light, it means power, can be used. When not in use, turn it counterclockwise and the socket will be cut off and the LED lights will go out.

**The Carrying Capacity Is Equivalent to the Traditional Socket.** Although the track type socket is small, but its carrying capacity has not been reduced. And the track type socket has a specially prepared USB interface, not because there is no suitable charger head can not charge the electricity, if the charger head slope is different, only need to increase this kind of jack on the mobile track, the problem is easily solved.

4 colors available  
surface and concealed mounting

## Concealed installation

- 1** Determine the installation location, make the appropriate groove according to the size of the track, and smooth the surface of the groove with cement.

- 2** After smooth the groove, mark the hole

- 3** Punch holes in each of the two marked positions, Insert the expansion screw protective sleeve into the hole of the wall

- 4** Remove the track terminal box lid

- 5** Follow the wiring diagram for wiring

- 6** Put back the terminal box lid (note: remove the knock hole), arrange the wire into the groove of the track for mounting and securing

- 7** Place the track against the wall and screw the track to the wall at the hole position

- 8** Install the module to finish the installation. (Here corresponds to the slot)

## Open installation

- 1** Determine the installation location, mark the hole

- 2** Punch holes in each of the two marked positions, Insert the expansion screw protective sleeve into the hole of the wall

- 3** Remove the track terminal box lid

- 4** Follow the wiring diagram for wiring

- 5** Put back the terminal box lid (note: remove the knock hole), arrange the wire into the groove of the track for mounting and securing

- 6** Place the track against the wall and screw the track to the wall at the hole position

# Innovative Removable Power Track

## Innovative Removable Power Track

Power track solution designed for aesthetic purposes and convenience. This pack includes power sockets equipped with different plugs and universal power socket that are compatible with various kind of plugs. The power track is 50 cm in length and it comes with 2x power sockets that connects to the track magnetically.

**1x Power Track**  
A seamless 50cm power track equipped with 1 CAT6 ethernet cable port, 1 HDMI port, and a 1.8m UK power cord with GST male port.

**1x USB Charger**  
Power sockets equipped with USB Type A-& C ports for charging wide range of devices.

**1x Universal Power Socket**  
Universal power socket compatible with various kind of plugs. Providing accessible power source module in workstations.

### Product Details

|              |                         |
|--------------|-------------------------|
| Height       | 2.7                     |
| Width        | 50                      |
| Depth        | 4.5                     |
| Warranty     | 2 Year Limited Warranty |
| Cut-out Size | 49.1 x 3.4 cm           |

## *STS SERIES DESKTOP BOXES*

We offer various type of desktop socket providing safe and convenient access to connections such as Power , USB , Data and Multimedia. Instead of running several different cable across your floor, which is a messy trip hazard just waiting to happen you can bring that connectivity directly to your desk , minimizing all that cable clutters

| STS-4D/Y  | Yellow | PC       | 6               | 60         |

### Features

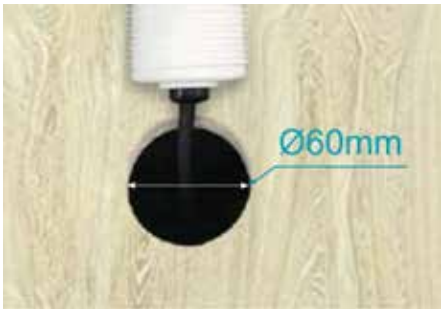

Wireless Charging : output 15W max Capacitive touch control switch Intelligent device control .

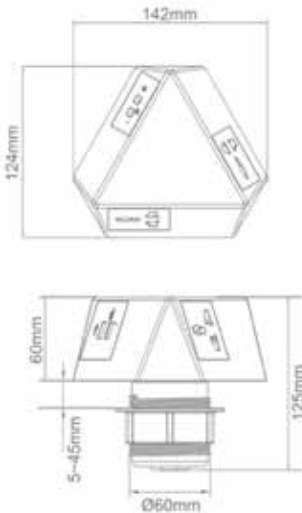

Wireless Charging top allows you to power Qi-enabled devices by simply placing it directly on the pad .

Intergrated Smart Chip allows you to remotely control the plugged-in devices from anywhere via Tuya APP .

Most of the office desks are equipped with a 60mm grommet hole. Therefore, this product eliminates the hassle of an extre opening for mounting

Features

STS-R90 F ( 4.2A ) / ( 2.1A )

Module capacity : 1 type 45 module  
+1 dual port USB charger

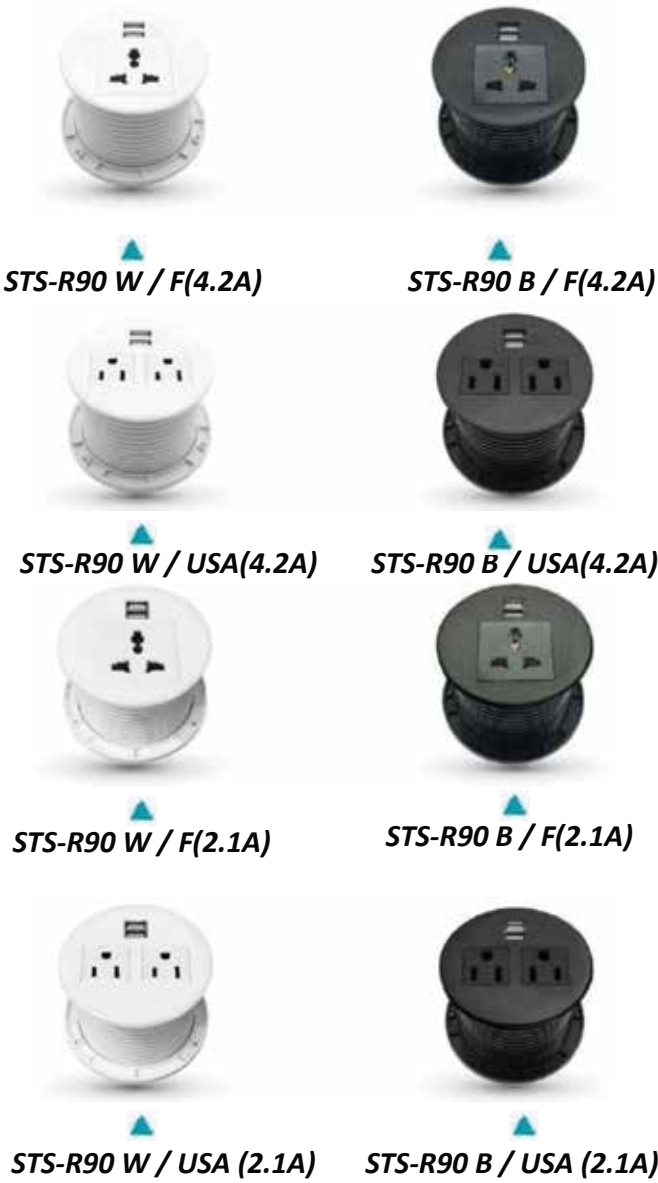

STS-R90 USA ( 4.2A ) / ( 2.1A )

Module capacity : 2 US socket module  
+1 dual port USB charger

| Model   | Color | Material       | Voltage  | Current |
|---------|-------|----------------|----------|---------|
| STW-31W | White | ABS + Silicone | 5V/9V DC | 2A(max) |
| STW-31G | Gray  | ABS + Silicone | 5V/9V DC | 2A(max) |

### Features

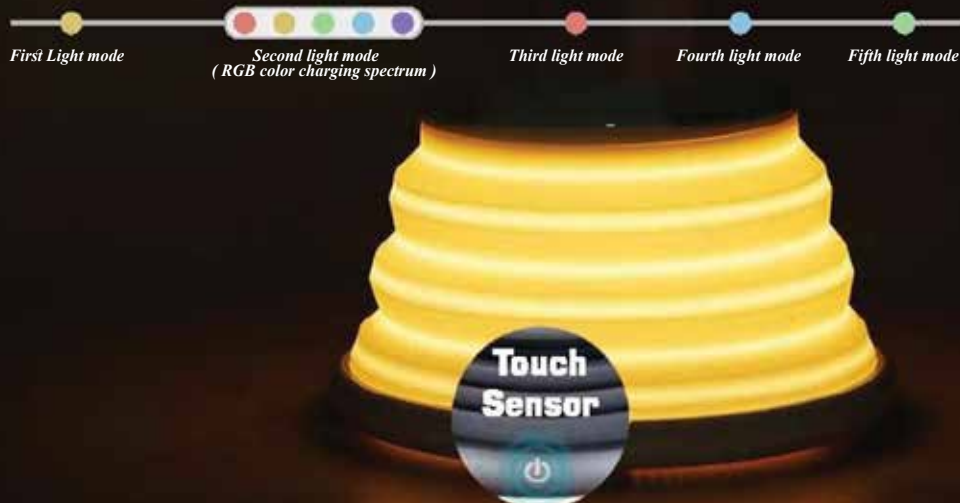

Ambience mood light  
 Night bedside lamp  
 Case Compatibility  
 Intelligent safety features : FOD, SCP  
 OTP and OCP  
 Certification : Qi, CE, FCC, RoHS

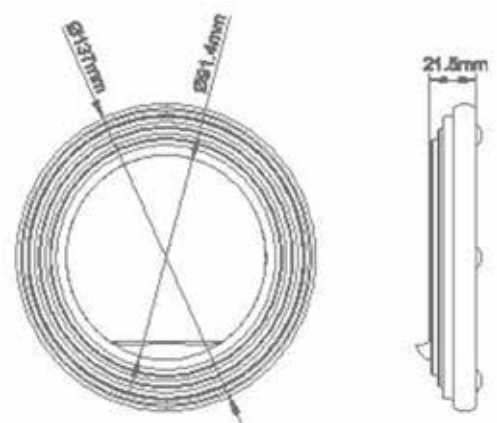

**Collapsible design :** allows for the phone to be positioned and charged at various angles depending on the use .

### AMBIENT MOOD LIGHT

With the touch sensor switch, you can easily toggle to choose your favorite color, or continuously cycle through the RGB color spectrum, to create a vibrant display for a perfect ambient experience.

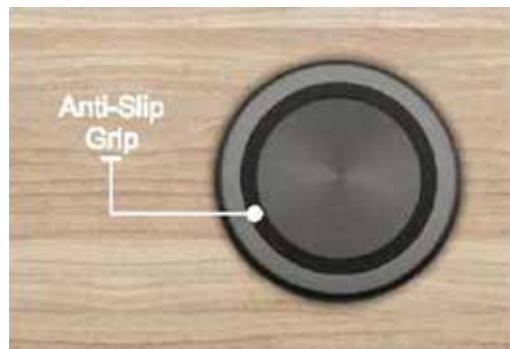

**Cooling vents :** Dissipates heat when charging, keeping your device safe .

## Features

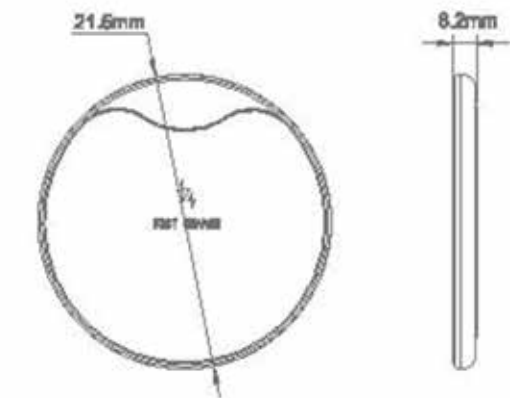

- 15W ( Max ) wireless charging
- Charging details indicator
- Ultra slim sturdy design
- Intelligent safety features : FOD, SCP
- OTP and OCP
- Certification : Qi, CE, FCC, RoHS

Features *silicone anti-slip* grip pads underneath the charging pad which keeps the charge secure on any surface for quick, easy charging .

Features a *tempered glass* surface with *high-grade aluminum alloy* bottom housing which brings you the better of idustrial design and helps better heat dissipation . At the same time , *compact size and ultra-slim round shape* of the wireless charger allows you to easily carry along with you .

## CHARGING DETAILS INDICATOR

The smart LED indicator displays voltage and power details in alternate sequence so you can determine the charging state at all time .

## *SCD SERIES UNDER DESK SPINAL CABLE DUCT*

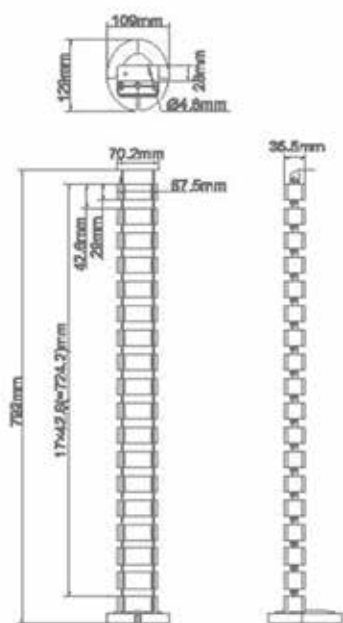

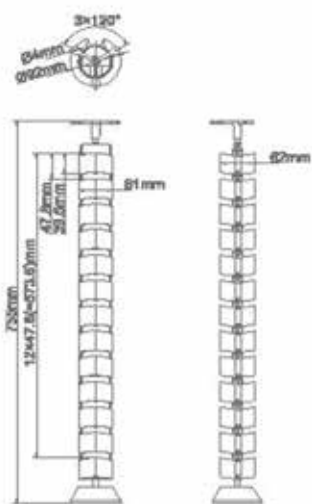

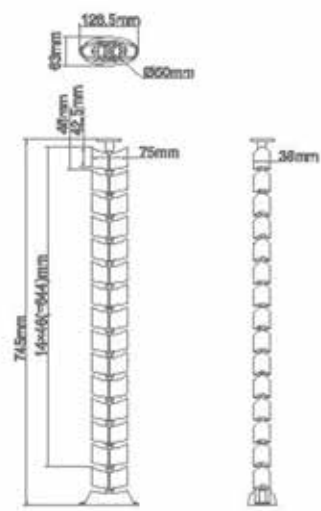

Our SCD series under spinal cable duct provides a practical and conventional looking wire management solution. Designed to follow the movement of any height-adjustable desks, the vertical cable duct can equally be used with regular fixed height desks to completely hide and protect all wires within the unit .

### *Features*

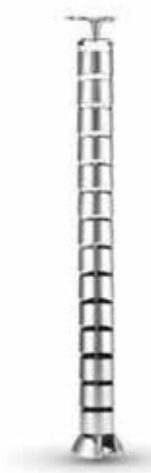

- \* Practical way to keep your cables neat and tidy.
- \* Snap-together interlink block with base plate and top hooking element to screw under top surface .
- \* Routes cables from desk to floor .
- \* Quickly insert and remove cables inside guide .
- \* Easy installation underneath a desk .
